

Backend AI Tipping Bot

6. utiligramOracle.js (AI Oracle Agent)

Perfect. Next on the list: the backend AI tipping agent that verifies posts, assigns a utility score, and executes automated tips using the EUT token.

Purpose: Periodically scans posts, assigns utility score, and triggers EUT tips + Utiligram logging.

Javascript

```
// oracle-backend/utiligramOracle.js
```

```
const { ethers } = require("ethers");
require("dotenv").config();
```

```
// Load ABIs
```

```
const feedAbi = require("../abis/UtiligramFeed.json");
const tokenAbi = require("../abis/ElevationUtilityToken.json");
```

```
const provider = new ethers.JsonRpcProvider(process.env.RPC_URL);
const signer = new ethers.Wallet(process.env.PRIVATE_KEY, provider);
```

```
// Contracts
```

```
const feed = new ethers.Contract(process.env.FEED_ADDRESS, feedAbi, signer);
const token = new ethers.Contract(process.env.TOKEN_ADDRESS, tokenAbi, signer);
```

```
// Constants
```

```
const BASE_TIP = ethers.parseUnits("25", 18); // 25 EUT
const REASON = "Verified community utility";
```

```
async function verifyAndTip(postId) {
  const post = await feed.getPost(postId);
  if (!post || !post.contentHash) {
    throw new Error("Post not found or invalid");
  }
```

```
  // Simulate AI scoring 0–1
  const score = Math.random(); // Replace with real ML model
```

```
  const amount = BASE_TIP * BigInt(Math.floor(score * 100)) / 100n;
```

```
  const tipTx = await token.tip(post.author, amount, REASON);
  await tipTx.wait();
```

```
  const recordTx = await feed.recordTip(postId, signer.address, amount);
  await recordTx.wait();
```

```
  console.log(`Tipped ${post.author} on post #${postId} with ${ethers.formatUnits(amount)} EUT`);
}
```

```
(async () => {
  try {
    const latestId = await feed.totalPosts();
    await verifyAndTip(latestId);
  } catch (err) {
    console.error("Error in Oracle:", err);
  }
})();
```

```
> Notes:
```

This can be run on a scheduled job (e.g., with Cron, Gelato, or Chainlink Automation)

Replace the random score with a trained model or human-audited logic
