

11. [contract_registry.md](#)

Purpose: Quick reference for all smart contracts, roles, and functions

Contract Registry

Below is a list of smart contracts deployed in the Elevation Foundation protocol along with their roles and responsibilities.

1. `ElevationStableToken.sol` (EST)

- Stablecoin minted 1:1 from verified business revenue
- Only DAO minters can mint
- IPFS hash logged per mint event
- Used for internal ledger and future real-world spend

****Key Roles**:**

- `DEFAULT\_ADMIN\_ROLE`: Setup & URI base updates
- `MINTER\_ROLE`: DAO or AI oracle that submits verified revenue

2. `ElevationOwnershipToken.sol` (EOT)

- Equity token for holders of DAO-controlled assets
- Receives dividends from revenue and DeFi yield
- Tradable on external exchanges

****Key Roles**:**

- `DEFAULT\_ADMIN\_ROLE`: Minting
- `TREASURY\_ROLE`: Distributes ETH/EST dividends

3. `ElevationUtilityToken.sol` (EUT)

- Used for tipping, Learn2Earn, governance boosts
- Distributed via AI-verified behavior
- Initial airdrop is timelocked for new users

****Key Roles**:**

- `DEFAULT\_ADMIN\_ROLE`: Setup
- `TIP\_ROLE`: AI/Oracle tipping engine
- `DISTRIBUTOR\_ROLE`: Airdrop executor

4. `UtiligramFeed.sol`

- Stores posts tied to utility proof (IPFS hashes)
- Tracks tips and verifies utility behavior via AI
- Posts can be searched, ranked, and filtered

****Key Roles**:**

- `DEFAULT\_ADMIN\_ROLE`: Contract control
- `VERIFIER\_ROLE`: Authorized backend tip logger

5. `ProfileRegistry.sol`

- Tracks Elev8 and Gener8 scores per user
- Used to unlock staking tiers and governance rights
- Updates handled by off-chain AI or DAO members

****Key Roles**:**

- `DEFAULT\_ADMIN\_ROLE`: Setup
- `EVALUATOR\_ROLE`: AI or DAO evaluator for rating updates

6. `ElevationYieldEngine.sol`

- Stablecoin staking vault + yield manager
- Supports laddered, AI-optimized strategies
- Future DeFi platform integrations possible

****Key Roles**:**

- `owner`: Strategy manager and treasury operations

****Last Updated**:** April 2025
